

select a gallery from the galleries menu

Thank you for installing minishowcase.

This is a placeholder text that you can change to welcome your users, to share links (you can use html inside it) or just to let everybody know about the wonders of [minishowcase](#). If you want to edit it, just open the `_info.txt` file that you'll find inside the `/galleries/` folder. You can add text, links to images, and even to [your galleries](#)! isn't that wicked?

We at [frwrд.net](#) hope that you enjoy your gallery as much as we have enjoyed designing and developing it.

And don't forget to [read the instructions](#), or [share your questions](#) with us in the community.

Enjoy!
